Integrated Curriculum

Alif's comprehensive curriculum guides children toward a purposeful path. While primarily based on the CBSE framework, it lays a strong foundation, enabling students to smooth transition into various international curricula.

Experiential Learning

Alif goes beyond traditional classroom methods by embracing and implementing innovative educational trends and concepts, offering students a more engaging and dynamic learning experience.

Smart Campus

The school boasts spacious buildings, expansive playgrounds, a children's park, state-of-the-art classrooms equipped with smart class technology, well-equipped labs, and a fleet of its own vehicles.

Islamic Studies/ Moral Science/ Arabic Language

Alif offers thoughtfully designed lessons in Islamic Studies, including regular teachings of the Holy Quran, Hadith, Islamic traditions, and the Arabic language.

In 2009, a group of forward-thinking visionaries established Alif International School in Riyadh with the mission of delivering high-quality, value-based education, along with a strong commitment to humanitarian and philanthropic endeavors. This mission was embraced wholeheartedly by the community, and, by the grace of The Almighty, Alif has now grown into the Alif Group of Schools.

With its continued dedication to excellence, Alif has expanded its horizons by establishing Alif Global School and Alif Virtual School, making quality education accessible to a wider community.
